<p>Introduction of Organizer</p>	<p>Founded in 1984, Foreign Economic Cooperation Center (China-EU Center for Agricultural Technology, hereinafter referred to as FECC) is a government-affiliated institution of director-general level in agricultural economic cooperation under the Ministry of Agriculture responsible for the management and implementation of foreign funded agriculture projects, foreign aid projects and bilateral and multilateral agriculture economic and technological cooperation projects. As an important institution to promote agricultural foreign economic cooperation, FECC has developed an excellent management team in terms of agricultural policy planning, project management and human resource development, rural poverty relief and development etc. by giving full play to the advantages and strengthening overall planning. In 2014, FECC was certified as South-South Cooperation Research, Training and Reference Center. In 2015, Sino-German Agriculture Center (Beijing) will be established in FECC and FECC has been appointed as the Chinese implementation institution.</p> <p>FECC is quite experienced and capable in agricultural research. The number of staff with post graduate degree has taken up over 40%. 31 are with PHD degree and 3 with post doctor degree. Many have professional titles such as senior economist, senior engineer, senior livestock engineers and senior agronomist. FECC has covered a wide range of research fields such as agricultural policy planning, rural development, modern agriculture, international cooperation, crop production, livestock, veterinary, aquaculture, environment protection, seeds, fodder and machinery etc. and has the top-level (Level A) engineer consultancy qualification.</p> <p>FECC is one of the most important organizers that implement foreign aid training projects from Ministry of Commerce. Since 2002, the Training Division under FECC has implemented over 70 foreign aid research projects, trained over 1200 person-time of management personnel and technology professionals from 80 countries and regions. The training projects have won recognition of the trainees because of the rich experience, targeted courses, good management team and facilities.</p>
--------------------------------------	---

<p>Introduction of Project Activities</p>	<p>Five modules have been designed centering the agriculture economic management of the countries along the Land and Maritime Silk Roads</p> <p>Module 1, experiencing Chinese culture. The experts from China Agriculture University will be invited to lecture on the China's national conditions and agricultural and historical cultures and China's farming culture and the trainees will watch traditional Chinese art- acrobatics.</p> <p>Module 2, Agriculture development in China. Experts from the Chinese Ministry of Agriculture, the China Agriculture University will be invited to talk about modern agriculture management, agriculture sustainable development, farmer's education and rural development as well as the industrialization of agriculture.</p> <p>Module 3, policy, development and cooperation. Officials and experts from the Chinese Ministry of Agriculture and the Ministry of Commerce will be invited to talk about the Land and Maritime Silk Road Initiative that China proposed, the status quo of Chinese agriculture development and the cooperation between China and the countries along the Land and Maritime Silk Roads.</p> <p>Module 4, country reports and meeting with Chinese experts. Chinese experts will be invited to exchange with participants on the status of agricultural development and ways to resolve the problems each may meet.</p> <p>Module 5, field visits. The trainees will visit Nanjing, Yancheng and Changsha to study China's modern agricultural development and will have discussion with relevant agricultural departments and enterprises of Jiangsu.</p>
