LAG Kuudestaan is local association for rural development located in the province of South Ostrobothnia in the western part of Finland.

Our region includes four municipalities: Alavus, Kuortane, Soini and Ähtäri. The distance to the Finnish capital, Helsinki, is 300–350 km and to other bigger towns as follows: Seinäjoki, 40–80 km, Tampere 100–140km and Vaasa 120–150km. LAG Kuudestaan region has ca 28 000 inhabitants.

Untouched nature, numerous beautiful lakes, the peace and tranquility of the countryside can be found in our area. We have charming old wooden houses, typical in our region as well as modern civilization in the middle of genuine natural surroundings.

On the other hand, we have lots of cultural events, festivals, activities for kids, art galleries, museums as well as shopping possibilities in our region.

Our livelihood lies mainly upon timber industry as we have several companies producing timber houses, windows, doors and other wooden structures. We also have a long tradition in boat manufacturing and other engineering industries. Agriculture is still strong part of our everyday life.
